GERMAN - basic level

OTHER
Design, Photoshop, CAD

ABOUT ME

An architect by education and a programmer by profession - I wish I could say this about myself in the near future. During my studies, I realized that I want to do something else, but I decided to finish what I started. Finally, I have begun working on front-end web development, which became my true passion and I want to develop myself on that field. Especially, I find JavaScript very powerful language, which I would like to master to perfection. After finishing courses and learning I want to go to work in a company, where I can acquire strong web development skills and spread my wings as professional front-end developer.

EXPERIENCE

FRONT-END DEVELOPER BOOTCAMP
CODERSLAB (09.01.17 – 24.02.17)
Very intensive course. Solid programing fundamentals and knowledge of front end. Work with professionals. Practical tasks and theoretical issues. Interesting projects. Systematization of my actual knowledge. 80/80 exam score.

ADDITIONALLY

CONSTRUCTION WORKER
CHEMOBUDOWA KRAKÓW S.A. (Holiday work in 2015, 2016 and 2017)
My first job. During breaks between semesters I went working abroad. It was a very good lesson of life and responsibility. Most of all I learned self-reliance, cooperation and planning.
